PROFESSIONAL SUMMARY

Software Engineer and Artificial Intelligence & Data Science graduate with experience in Full Stack Development, Machine Learning, Deep Learning, and Data Science. Skilled in building web and mobile applications using MERN Stack, Kotlin, Firebase, and TensorFlow, with a focus on scalable architecture, secure backend systems, and data-driven solutions. Interested in developing intelligent products that combine software engineering and AI to solve real-world problems.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, C

Frameworks & Libraries: React.js, Node.js, Express.js, Jetpack Compose, TensorFlow, NumPy, Pydantic

Databases: MongoDB, MySQL, Firebase Firestore

Tools & Platforms: Git, GitHub, Docker, Postman, Firebase, Google AI Studio, VS Code, Oracle

Core Concepts: Machine Learning, Deep Learning, Computer Vision, Neural Networks, REST APIs, RAG, Generative AI

EXPERIENCE

MINDMATRIX — GENERATIVE AI INTERN

Bangalore | Mar 2026 – May 2026

- Developed and shipped Android application features using **Kotlin and Jetpack Compose**, contributing across the mobile application development lifecycle during a **3-month internship**.
- Built AI-driven application workflows by integrating **Google AI Studio and Generative AI tooling** into product features, enabling intelligent application functionality.
- Integrated **3 Firebase services — Authentication, Firestore, and real-time database capabilities** to support secure authentication, persistent data, and real-time application functionality.
- Contributed across **4 key development stages — feature development, AI integration, debugging, and deployment** for AI-driven, cloud-connected mobile applications.

PROJECTS

ACAD-SYNC — Academic Management Platform

- Engineered a role-based academic management platform supporting **3 user roles — Students, Parents, and Teachers** — with dedicated dashboards and workflows.
- Implemented **5+ core modules**, including JWT authentication, attendance tracking, course management, announcements, and file uploads.
- Automated **Excel-based academic data processing** to extract student-specific records and generate personalized parent reports, replacing manual record preparation.
- Designed MongoDB/Mongoose-backed workflows for centralized academic data management and secure role-based access.

BLACK HOLE AI — Physics-Aware Astronomy AI Platform

- Building a physics-aware astronomy AI platform combining **blackhole image analysis, deterministic physics, and evidence-grounded AI**.
- Implemented CPU-first CV features in **Python, NumPy, and Pydantic**: centroid, radial profiles, ring geometry, asymmetry, and orientation.
- Validated core CV schemas/utilities with 122 unit tests; datasets include **EHT GRMHD, M87* and Sgr A***.

EDUCATION

B.E. — Artificial Intelligence & Data Science

Srinivas Institute of Technology | CGPA: 7.2

Sept 2022 – Jun 2026

CERTIFICATIONS

- **Agentic AI Foundations Associate — Oracle**
- **Deep Learning with TensorFlow — IBM**
- Software Engineering Job Simulation — JPMorgan Chase & Co.
- GenAI-Powered Data Analytics Sim. — Tata Group
- Solutions Architecture Job Simulation — AWS
